

AVIATOR™ RIDGE VENT

Overview

Beautifully designed with the needs of contractors in mind, Aviator showcases the innovation that is the hallmark of Quarrix design. This innovation, combined with the durability and proven performance our products are known for, puts Aviator in a class by itself. With both filter and non-filter options available, Aviator provides excellent roof ventilation in any climate. Simply put, Aviator is **A Better Way** to vent a roof.

Quarrix Aviator Benefits

- Winged Edge**
 Quarrix's patented winged edge doesn't draw snow or rain into the vent and promotes better ventilation by letting air flow out of both sides of the vent.
- Clog-Free Baffles**
 Clog-free baffles improve air flow by keeping leaves, pine needles and similar debris from impacting the performance of the vent.
- Aesthetically Pleasing Design**
 With a darker shadow line, lower appearance and shingle-over design, Aviator is less noticeable from the ground and enhances the image of the roof.
- Promotes Drainage**
 Twenty-seven lowered weep holes on the bottom outer edge (per side) of Aviator ensure fast drainage.
- Easy Installation**
 A nailing line and nail bosses make installation quick and easy.
- The Perfect Fit – Every Time**
 Aviator can be cut anywhere. Cut lines help keep your installation on track.
